VORQS
INTEGRATED FIT-OUT & CONTRACTING

EGYPT | CORPORATE PROFILE

Integrated Fit-Out & Contracting

A coordinated approach to building, finishing and specialist systems.

01 / ABOUT VORQS

Built around clear delivery.

VORQS is an Egypt-based fit-out and contracting company bringing interior finishing, building works and specialist systems together under a clear project scope.

We work from the client brief and approved drawings, align technical details and site sequencing, and follow the agreed scope through execution and handover.

ONE COORDINATED SCOPE

Interior, architectural and specialist packages planned together.

DRAWING-LED EXECUTION

Materials, dimensions and interfaces follow approved project documents.

VISIBLE SITE PROGRESS

Clear work stages, coordination and completion reviews.

02 / CAPABILITIES

One delivery framework. Specialist execution.

Services are assembled to match the project scope, drawings and site conditions.

01

Interior fit-out

Finishing packages for residential, commercial and administrative spaces.

02

Aluminum & glass

Windows, doors, facades, curtain wall, skylights and glazed partitions.

03

HPL systems

Compact laminate sanitary partitions, cubicles and doors.

04

Kretal & stainless steel

Kretal steel doors and gates, plus stainless-steel details.

05

Contracting & delivery

Civil and architectural site works with coordinated project follow-through.

03 / SPECIALIST SYSTEMS

Aluminum & glass

Architectural openings and glazed systems coordinated with the building envelope and interior scope.

- Aluminum windows and doors
- Glazed facades and curtain wall
- Glass skylights and roof openings
- Glass doors and internal partitions
- Hardware, glazing and interfaces selected to approved schedules

> System selection, glass build-up and finishing details are confirmed against the project drawings and approved specifications.

04 / SPECIALIST SYSTEMS

HPL / COMPACT

HPL sanitary partitions

Durable compact laminate solutions for washrooms and other high-use areas.

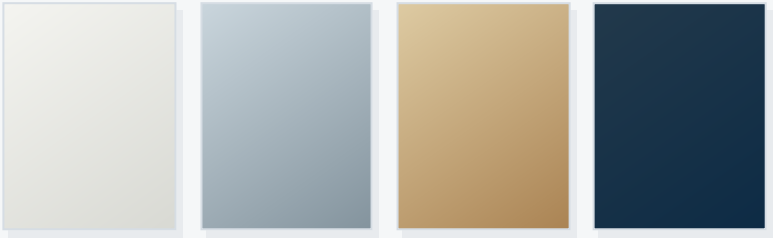

PANEL
Compact laminate

HARDWARE
Grade 304 stainless steel

DETAIL
Approved layouts

FINISH
Project-selected colours

- Compact HPL cubicles, partitions and doors
- Panel thickness and finish chosen for the approved scope
- 12 mm compact panels where specified
- Hinges, locks, supports and legs coordinated as a complete set
- Grade 304 stainless-steel hardware when required by specification

Measured, detailed and installed to approved layouts, clearances and hardware schedules.

05 / METALWORK

Kretal ironwork & stainless steel

Made-to-measure Kretal ironwork and stainless-steel details, coordinated with the approved design.

- Kretal steel doors, windows and gates
- Kretal steel handrails and protective guards
- Stainless-steel handrails, trims and made-to-measure details
- Fabrication and installation to approved dimensions and drawings
- Material grade and finish matched to the project specification

> Materials, details and finish are confirmed against the approved drawings and project specification.

06 / BUILDING & INTERIORS

Finishing and contracting, connected on site.

VORQS coordinates the sequence between building works, interior trades and specialist installations.

Interior finishing
Floors, ceilings, wall finishes, joinery and glass elements within the agreed package.

Civil and architectural works
Site execution organized around approved scope, interfaces and work sequence.

Project follow-through
Coordination, progress review, inspection and handover documentation.

07 / DELIVERY METHOD

A controlled path from brief to handover.

01

Understand

Clarify requirements, priorities and site constraints.

02

Assess

Review drawings, quantities, interfaces and site readiness.

03

Coordinate

Prepare technical details, submittals and work sequencing.

04

Mobilize

Align materials, responsibilities and installation readiness.

05

Execute

Coordinate site activities with progress and quality checks.

06

Handover

Inspect completed scope, close snags and document delivery.

Quality and safety are managed through project-specific checks, approved materials, clear work fronts and documented completion reviews.

08 / SELECTED WORK

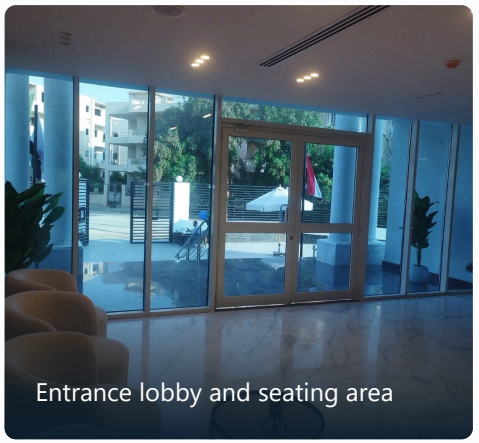

Work that connects the details.

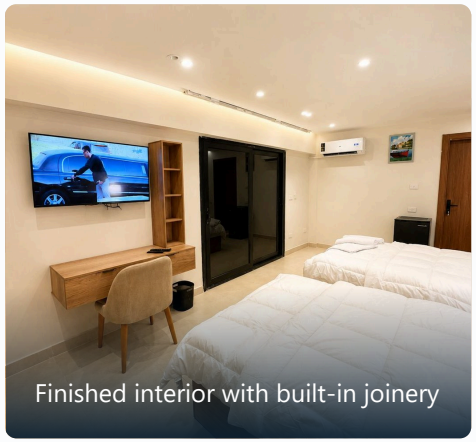

A selection of project photographs published on the VORQS website.

Glazed facade and main entrance

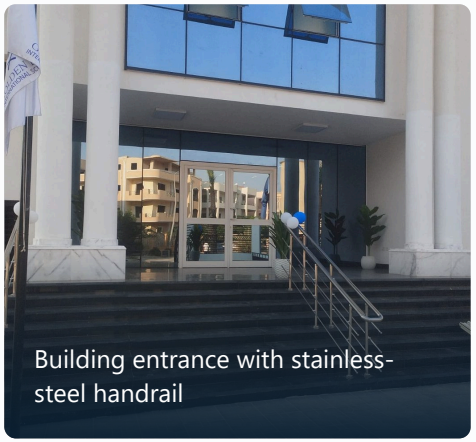

Integra Egypt factories: administration building

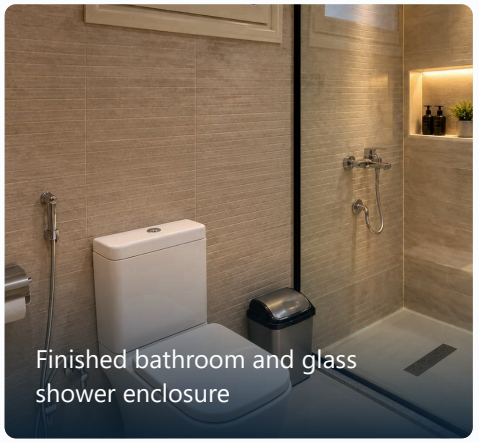

Integra Egypt factories: ground-floor wing and aluminum windows

Entrance lobby and seating area

Finished interior with built-in joinery

Installed glass skylight

Building entrance with stainless-steel handrail

Finished bathroom and glass shower enclosure

09 / THE VORQS APPROACH

Five principles behind every project.

V

Vision

See the complete outcome before execution begins.

O

Optimization

Improve methods, sequencing and resource use.

R

Reliability

Build trust through consistent commitments and delivery.

Q

Quality

Protect workmanship, materials and finishing standards.

S

Solutions

Resolve site challenges with practical, accountable action.

LET’S DISCUSS YOUR PROJECT

Build the next space with VORQS.

Share the project brief, drawings or scope requirements with our team.
